Zoho First Round Preparation Checklist 🎯

Overview

This checklist covers all essential topics for Zoho's first round aptitude test. Check off each topic as you complete your preparation.

📊 Quantitative Aptitude

🔢 Number Systems

- ☐ **Number Types**
  - ☐ Natural numbers, whole numbers, integers
  - ☐ Rational and irrational numbers
  - ☐ Prime and composite numbers
- ☐ **Number Properties**
  - ☐ Divisibility rules (2, 3, 4, 5, 6, 8, 9, 10, 11)
  - ☐ LCM and HCF/GCD
  - ☐ Factorization
- ☐ **Number Operations**
  - ☐ BODMAS/PEMDAS
  - ☐ Fractions and decimals
  - ☐ Percentage conversions

🧮 Algebra

- ☐ **Basic Algebraic Operations**
  - ☐ Linear equations (one variable)
  - ☐ Linear equations (two variables)
  - ☐ Quadratic equations
- ☐ **Algebraic Identities**
  - ☐ $(a+b)^2$, $(a-b)^2$, $(a+b)(a-b)$
  - ☐ $(a+b)^3$, $(a-b)^3$
  - ☐ a^3+b^3, a^3-b^3
- ☐ **Inequalities**
  - ☐ Linear inequalities
  - ☐ Quadratic inequalities

📈 Averages

- ☐ **Basic Concepts**
  - ☐ Simple average/mean
  - ☐ Weighted average
  - ☐ Average speed problems
- ☐ **Applications**
  - ☐ Age-related averages

    - ☐ Score-related averages
    - ☐ Combined averages

📊 Logarithms

- ☐ **Fundamentals**
    - ☐ Definition and properties
    - ☐ log(ab) = log(a) + log(b)
    - ☐ log(a/b) = log(a) - log(b)
    - ☐ $\log(a^n) = n \times \log(a)$
- ☐ **Applications**
    - ☐ Change of base formula
    - ☐ Exponential equations
    - ☐ Growth and decay problems

🔄 Progressions

- ☐ **Arithmetic Progression (AP)**
    - ☐ nth term formula
    - ☐ Sum of n terms
    - ☐ Common difference problems
- ☐ **Geometric Progression (GP)**
    - ☐ nth term formula
    - ☐ Sum of n terms
    - ☐ Infinite GP sum
- ☐ **Harmonic Progression (HP)**
    - ☐ Basic concepts
    - ☐ Relationship with AP

⏱️ Time, Speed, and Distance

- ☐ **Basic Formulas**
    - ☐ Speed = Distance/Time
    - ☐ Average speed calculations
    - ☐ Relative speed concepts
- ☐ **Applications**
    - ☐ Train problems
    - ☐ Boat and stream problems
    - ☐ Circular track problems
    - ☐ Meeting point problems

💰 Profit and Loss

- ☐ **Basic Concepts**
    - ☐ Cost price, selling price
    - ☐ Profit% and Loss% formulas
    - ☐ Marked price and discount
- ☐ **Advanced Topics**

    - ☐ Successive discounts
    - ☐ Partnership problems
    - ☐ False weight problems

⚖️ Ratio and Proportion

- ☐ **Fundamentals**
    - ☐ Simplifying ratios
    - ☐ Proportion properties
    - ☐ Direct and inverse proportion
- ☐ **Applications**
    - ☐ Mixture and alligation
    - ☐ Partnership ratios
    - ☐ Age ratio problems

💸 Simple and Compound Interest

- ☐ **Simple Interest**
    - ☐ SI = (P×R×T)/100
    - ☐ Amount = P + SI
    - ☐ Rate and time calculations
- ☐ **Compound Interest**
    - ☐ CI formulas (annual, half-yearly, quarterly)
    - ☐ Difference between CI and SI
    - ☐ Population growth problems

📐 Geometry & Mensuration

- ☐ **2D Shapes**
    - ☐ Triangle properties and area
    - ☐ Quadrilateral properties and area
    - ☐ Circle properties and area
    - ☐ Polygon properties
- ☐ **3D Shapes**
    - ☐ Cube and cuboid volume/surface area
    - ☐ Cylinder volume/surface area
    - ☐ Sphere and hemisphere
    - ☐ Cone and frustum
- ☐ **Coordinate Geometry**
    - ☐ Distance formula
    - ☐ Section formula
    - ☐ Area of triangle using coordinates

🎲 Probability

- ☐ **Basic Concepts**
    - ☐ Sample space and events
    - ☐ Classical probability

    - ☐ Conditional probability
- ☐ **Applications**
    - ☐ Card problems
    - ☐ Dice problems
    - ☐ Ball and urn problems
    - ☐ Independent and dependent events

🔄 Permutation and Combination

- ☐ **Fundamentals**
    - ☐ Factorial concepts
    - ☐ nPr and nCr formulas
    - ☐ Difference between P and C
- ☐ **Applications**
    - ☐ Arrangement problems
    - ☐ Selection problems
    - ☐ Circular arrangements
    - ☐ Word formation problems

📊 Data Sufficiency

- ☐ **Concepts**
    - ☐ Understanding question types
    - ☐ Statement analysis
    - ☐ Sufficiency determination
- ☐ **Practice Areas**
    - ☐ Number-based questions
    - ☐ Algebra-based questions
    - ☐ Geometry-based questions
    - ☐ Age and ratio problems

💻 Programming Fundamentals (First Round)

🔤 Basic Programming Concepts

- ☐ **Programming Logic**
    - ☐ Flowcharts and algorithms
    - ☐ Pseudocode writing
    - ☐ Basic input/output operations
- ☐ **Data Types and Variables**
    - ☐ Integer, float, character, string
    - ☐ Variable declaration and initialization
    - ☐ Constants and literals

🔄 Control Structures

- ☐ **Conditional Statements**
    - ☐ if-else statements

    - ☐ switch-case statements
    - ☐ Nested conditions
- ☐ **Loops**
    - ☐ for loops
    - ☐ while loops
    - ☐ do-while loops
    - ☐ Nested loops

🧮 Basic Problem Solving

- ☐ **Pattern Recognition**
    - ☐ Number patterns
    - ☐ Star patterns
    - ☐ Sequence identification
- ☐ **Simple Algorithms**
    - ☐ Finding maximum/minimum
    - ☐ Sum and average calculations
    - ☐ Prime number checking
    - ☐ Factorial calculation

📚 Arrays and Strings (Basic)

- ☐ **Array Fundamentals**
    - ☐ Array declaration and initialization
    - ☐ Array traversal
    - ☐ Finding elements in arrays
- ☐ **String Basics**
    - ☐ String operations
    - ☐ String comparison
    - ☐ Basic string manipulation

🧠 Logical Reasoning

- ☐ **Pattern Completion**
    - ☐ Number series
    - ☐ Letter series
    - ☐ Mixed series
- ☐ **Coding-Decoding**
    - ☐ Letter coding
    - ☐ Number coding
    - ☐ Symbol coding

📝 Study Schedule Template

Week 1-2: Number Systems & Algebra

- ☐ Day 1-3: Number Systems
- ☐ Day 4-7: Algebra basics

- ☐ Day 8-10: Practice problems
- ☐ Day 11-14: Mixed practice

Week 3-4: Averages, Logarithms & Progressions

- ☐ Day 15-17: Averages
- ☐ Day 18-21: Logarithms
- ☐ Day 22-25: Progressions
- ☐ Day 26-28: Combined practice

Week 5-6: Time-Speed-Distance & Commercial Math

- ☐ Day 29-32: Time, Speed, Distance
- ☐ Day 33-36: Profit and Loss
- ☐ Day 37-40: Ratio and Proportion
- ☐ Day 41-42: Practice tests

Week 7-8: Interest & Geometry

- ☐ Day 43-46: Simple & Compound Interest
- ☐ Day 47-52: Geometry & Mensuration
- ☐ Day 53-56: Practice and revision

Week 9-10: Probability & Programming

- ☐ Day 57-60: Probability
- ☐ Day 61-64: Permutation & Combination
- ☐ Day 65-68: Programming basics
- ☐ Day 69-70: Final revision

📚 Recommended Resources

Books

- ☐ R.S. Aggarwal - Quantitative Aptitude
- ☐ Arun Sharma - How to Prepare for Quantitative Aptitude
- ☐ M. Tyra - Magical Book on Quicker Maths

Online Platforms

- ☐ IndiaBix (Free practice)
- ☐ GeeksforGeeks (Programming + Aptitude)
- ☐ Testpot/Freshersworld (Mock tests)
- ☐ BYJU'S/Unacademy (Video lectures)

Practice Strategy

- ☐ **Daily Practice**: 2-3 hours minimum
- ☐ **Weekly Tests**: Full-length mock tests

- ☐ **Revision**: Last 2 weeks intensive revision
- ☐ **Weak Areas**: Extra focus on challenging topics

☑ Progress Tracking

Topic	Started	In Progress	Completed	Confidence Level (1-5)
Number Systems	☐	☐	☐	☐☐☐☐☐
Algebra	☐	☐	☐	☐☐☐☐☐
Averages	☐	☐	☐	☐☐☐☐☐
Logarithms	☐	☐	☐	☐☐☐☐☐
Progressions	☐	☐	☐	☐☐☐☐☐
Time, Speed, Distance	☐	☐	☐	☐☐☐☐☐
Profit and Loss	☐	☐	☐	☐☐☐☐☐
Ratio and Proportion	☐	☐	☐	☐☐☐☐☐
Simple & Compound Interest	☐	☐	☐	☐☐☐☐☐
Geometry & Mensuration	☐	☐	☐	☐☐☐☐☐
Probability	☐	☐	☐	☐☐☐☐☐
Permutation & Combination	☐	☐	☐	☐☐☐☐☐
Data Sufficiency	☐	☐	☐	☐☐☐☐☐
Programming Basics	☐	☐	☐	☐☐☐☐☐

🎯 Quick Tips for Success

1. **Time Management**: Practice with a timer for each topic
2. **Formula Sheet**: Create a quick reference formula sheet
3. **Weak Areas**: Spend extra time on topics you find challenging
4. **Mock Tests**: Take at least 2-3 full-length tests per week
5. **Programming**: Focus on logic and basic syntax for first round
6. **Revision**: Last week should be pure revision and practice tests

---

📞 Need Help?

- Create separate practice files for each topic
- Track your daily progress
- Focus on accuracy over speed initially
- Speed will come with practice

Good luck with your Zoho preparation! 🚀
